

Imagine your career with us

NGIS has been creating spatial information technology solutions since the industry was in its infancy. Now a mature and respected player in the Australian field, we have more than 85 staff across Australia and the Asia Pacific region including Perth, Brisbane, Sydney and Hong Kong.

As Australia's leading independent provider of location-based technology, we have a reputation for excellence and innovation in the development of advanced holistic spatial information solutions.

In 2007, we were awarded four Asia Pacific Spatial Excellence Awards, including the prestigious J K Barrie Award. We were also recognised for two years running in the Deloitte Fast 50 (2004 & 2005).

NGIS at a glance:

Spatial information technology explosion creates endless employment opportunities

In just a few short years, the spatial information industry has undergone explosive growth. Using mapping technology, you can now visually track the migration routes of polar bears, spot potential hazards such as cyclones or fires heading across vast landscapes, or locate and plot a route to your favourite restaurant for dinner – all from your desktop computer.

Technological solutions offered by the spatial information industry, to solve everyday problems are endless. Restrictions imposed by cost, information access and technological know-how are all but gone.

Spatial information solutions are now creating some of the most powerful decision-making tools available to you for use at work and at home.

The only restriction is your imagination.

5 key benefits of working at NGIS

Work and home life balance within a flexible environment

The NGIS team is made up of a diverse range of individuals from all backgrounds and cultures. Many of our people work a variety of flexible working arrangements including staggered start and finish times, adjustable work weeks and work-from-home options. As a result NGIS, enjoys very low staff turnover and a happy and fulfilling environment.

Strong individual accountability and responsibility

NGIS operates a flat management structure with a fully operational and 'hands-on' executive leadership team. The nature of our work also requires a high degree of responsibility and autonomy to meet the needs of our project-oriented business. These are some of the key reasons why our team has created a stream of award-winning, client-focused solutions that ensure NGIS remains ahead of the rest.

Opportunities to work interstate and abroad

The spatial information industry is growing fast and as one of the companies best equipped to meet the demands of a growing number of cross industry clients, we are continually winning new business. We currently operate across Australia and the Asia Pacific regions with offices in Perth, Sydney, Brisbane and Hong Kong. New opportunities for current staff to work on interstate and international secondment are presenting themselves all the time with the situation expected to increase into 2009 and beyond.

Self-development and learning

We actively encourage our people to seek every opportunity to increase their skill sets and personal development through formal and informal education. NGIS offers internal training and development, supports Microsoft Certification and other approved external training including one-off courses such as part-time MBA's.

Competitive remuneration and salary packaging options

We have a diverse range of technical roles including GIS analysts, software developers and consultants and offer competitive remuneration and salary packaging options in line with Industry expectations. We also operate an annual salary review process as part of our Crystal performance and development program, regularly benchmarking against industry standards.

Why our people love working at NGIS

1. Involvement in a variety of interesting projects
2. Company camaraderie
3. Opportunity to work with diverse & interesting clients
4. Career prospects
5. Working with cutting-edge technology
